

What is Vigilo?

Vigilo is the computersystem that this childcare is using in order to improve the communication with the parents. You can access the system through Internet – by using the username and password provided by the childcare. The system is optimized for several browsers.

With Vigilo parents can access whatever open information the childcare has published and gather information about their own child/children. More routines will be added in the future.

We encourage all parents to double check all the information about their child/children – and in case of corrections please notify the childcare as soon as possible. Please use the message function in the system to do so. Changes in personal info can easily be done by clicking the “my account” from the menu. Please tell the childcare in case of changes in approvals, contact persons and so on.

All data in Vigilo is being handled with a great level of security. Vigilo is delivered by Vigilo AS – please see www.vigilo.no for further information.

What does Vigilo contain for parents?

When you are logged on to the system, you will get to the main screen of the parent portal. Here you can see the following:

- Picture of your child/children – click the picture for information regarding the child.
- Listing of message-communication with the kindergarten.
- Access and write messages to the kindergarten.
- Listing of latest news for your child/children.
- Weatherforecast with link to more details.

Home page - menu

- "My account" – Simply change contact information and edit your notices
- "Vacation" – Simple registration of planned vacations for your child/children
- "Employees" – Pictures of all employees in the childcare
- "About the childcare " – Presentation of the childcare
- "Information" – Access to documents published by the child care
- "Log out" – Shutting down the connection to Vigilo.

You can always return to the home page by clicking the Vigilo logo or menu option Home page.

Individual information

You will get access to further information by clicking the portrait of the child. You will then get the following options.

Day Plan

Here you will find information about times of delivery and pickup, trips and other activities that the child is attending.

Messages

List of all communication with the childcare.

Week Plan

Like Day Plan but with a 1-week overview. It is possible to go a couple of weeks back and forth. Days with planned activities are marked bold blue.

Activity

Here you will find reports, often with pictures, from trips and other activities that your child has attended.

Day Report

Here you will find day reports, often with pictures, from your child's class or from the entire kindergarten.

Meal list

Listing of meals – often with general information on what is being served. Click the meal for further details.

Schedule

Listing of which days the child is booked in the kindergarten and information about absence and planned absence.

Contacts

Listings of contacts attached to the child – and those who are permitted to pick up the child.

Permits

Listing of which types of permits the childcare has, and which concerts are registered on your child.

Events

Here you can find small reports on individual activities during the day. There are also information about sleeping, diaper change and eating where this is an option. A complete history is accessible on all accounts.

Portfolio

Here you will find pictures and other documents regarding the child.

Personal Data

Information about the child and parents contact information.
